Port-A-Larm^{GPRS}

Have the ultimate portable high security alarm system for your building or construction site

Port-A-Larm is there when you can't be. This state-of-the art portable wireless alarm system protects your valuable assets by enabling you to monitor them 24 hours a day, 7 days a week.

The units can have wireless door contact so that should a door be opened, the **Port-A-Larm** will send the activation to the Monitoring Station. The System is armed and disarmed by a remote pendant.

Port-A-Larm is a portable, wireless GSM, GPRS alarm system which allows you to secure your valuables and monitor them wherever you are. Built-in alarm sensors provide you with a flexible and customizable security solution.

The **Port-A-Larm** is a self-contained alarm, with built in battery siren and communication device (GPRS). The system can either alert the Monitoring Station or yourself by text message of any Mains Fail, Burglary Activations, Low Battery.

The System can be fully customised to meet your needs. Additional remote pendants, wireless motion detectors, smoke detectors, roller door contacts or door contacts can be provided as optional extras.

The **Port-A-Larm** has been designed primarily for the building and construction sector, as the unit can be moved to different building sites when required however, **Port-A-Larm** is extremely versatile. It can be used to protect Boats, Machinery, Sheds, Rental Properties, Portable Containers and even Holiday Homes to name a few. The **Port-A-Larm** is a wireless security system that can be monitored by a Monitoring Station or by SMS to three different mobile numbers should an alarm activation occur.

RadioNet Monitoring is committed to protecting your portable valuables. For more information on the **Port-A-Larm** or to order now, contact us at 08 9415 1331
